

## **LIGHT SOURCES – low power**

**HL2012-001 (MES in vial w/sockets)    HL2012-101 (MES in vial w/terminals)**

### **DESCRIPTION:**

IEC manufactures several low power light sources for general basic electricity experiments. These are low cost light sources housed in simple vials. See also HL2010-001 and HL2011-001 for low power light sources where the lamp is exposed.

**HL2012-001** holds an MES lamp protected inside a transparent container. The top of the container is fitted with 4mm sockets for connection.

**HL2012-101** holds an MES lamp protected inside a transparent container. The top of the container is fitted with 4mm spin free terminals for connection.

**HL2012-001 4mm sockets**

**HL2012-101 spin-free terminals**

**Physical size: 55x110mm DxH**

**Weight: 0.05 kg**

**A standard 2.5V MES lamp is included in each unit.**

**Designed and manufactured in Australia**
